

## 30 INCH SAW

This clamp design cuts through a single jumper and eliminates concerns of aligning multiple cuts. It's retroactive, so all previously purchased 20 inch super grinders can be added to the clamp, and is easily removed for standalone applications. The clamp portion may be used with multiple Seanic cutting tools including both the 30 inch and 20 inch super grinders as well as other cutting and drilling accessories.

### WHAT'S IN THE BOX

- SPARES KIT
- OPERATING & MAINTENANCE MANUAL

Through this streamlined design, the 30 inch saw provides maximum cut depth with minimal clamping support. The clamp design holds the grinder steady ensuring straight cut and preventing blade binding in both horizontal and vertical positions. Diameters range from 12 to 18 inches OD with adapter shoes allowing diameters as small as 4 inches.

### TECHNICAL SPECIFICATIONS

<b>Weight</b>	<b>345 lbs (air) 280 lbs (water)</b>
<b>Dimensions</b>	<b>43"W x 27 1/4"D x 78"H</b>
<b>Features</b>	<b>Clamping range of 12-18" OD Maximum cut depth of 11 1/2"</b>
<b>Depth Rating</b>	<b>Infinite</b>
<b>High Torque Motor</b>	<b>6,000 in-lb</b>
<b>Maximum Pressure</b>	<b>3,000 psi</b>
<b>Maximum Flow</b>	<b>20 gpm</b>
