

12TE TENSIONER

Purpose built providing up to 12T constant back tension for umbilical spooling.

- Compact built unit with local controls and digital readout monitoring cable/umbilical tension, speed and length
- Complimented with Seanic UK spooler and guide frame supplying a precision tensioning service.

WHAT'S IN THE BOX

- OPERATING MANUAL
- TEST CERTIFICATE
- INTEGRATED HPU

TECHNICAL SPECIFICATIONS

Max Back Tension	12T
Max Line Speed	20 m/min
Drum Size	1800 OD x 500 mm Wide
Hydraulic Power Unit	Hatz 44.1kW Diesel, Tandum Dowty Gear Pumps, Air Blast & Seawater Coolers
Controls	Local Directional Control Valve & Tension Control Circuit
Operating Monitoring	Digital Readouts for Cable Tension, Speed & Length
Frame	Welded Universal Column skid, c/w lift points, fork pockets and tiedown weld plates
Overall Dimensions	4000 x 2000 x 2350 mm H
Weight	7500 kg
